WORKING WITH STORAGE & FILING

ORDERING STORAGE AND FILING:

- All units are priced each. Price each includes one drawer divider in all 6" box and 12" file drawers, and one front-to-back file conversion kit in all lateral file drawers.
- Pedestal cabinets, 2-drawer lateral files, and 2-high storage cabinets are dimensioned to fit under work-surfaces, and may be used to support work-surfaces.
- Order optional counterweights for all lateral file units separately.
- For most units, nominal widths = actual widths; be sure to size your work-surfaces to allow the correct amount of space when placing units inside work-stations and wrapping the end with a panel (illustration #1).

Illustration #1:

STORAGE & FILING SPECIFICATIONS

In General: All storage and filing units shall be of furniture grade steel construction, resistance welded to create sturdy and durable enclosures and drawers. All units shall have an integral base with levelling glides accessible from both the interior and exterior of the cases, allowing 5/8" to 1-5/8" height adjustment. All drawers are gang-locked with a master-keyed, core removable lock. Drawer and door pulls on all units are black plastic, recessed square pull. Optional color-matched drawer pulls and other drawer pull styles are available.

Material: Best quality steel, paint, and hardware. External surfaces shall be uniform and free of defects. All painted surfaces are spray coated with specially formulated high temperature baked enamel.

Pedestals: Shall have the general construction described above, with a 3/8" radius on the front vertical edges of all drawers. All 12" file drawers shall have full-extension ball bearing glides. All 6" box drawers shall have 3/4 extension nylon roller glides as standard. Optional ball bearing glides are available for 6" drawers. Mobile units shall have 2-locking and 2-non-locking casters. A variety of 3" pencil, 6" box, 12" file, and lateral file drawer configurations shall be available in 18", 22", and 28" depths. Lateral file drawers on the PED-10 shall have full extension ball bearing glides.

Center Drawers: Shall have the general construction described above, with a 3/8" radius on the front vertical edges of all drawers. Center drawers shall have a one piece steel housing and 3/4 extension ball bearing glides with take-apart feature.

Bookcases: Shall have the general construction described above. Shelves shall be adjustable in 2" increments.

Lateral Files: Shall have the general construction described above, with a 3/8" radius on the front vertical edges of all enclosures. All lateral file drawers shall have full extension ball bearing glides. A safety interlock system shall be included to prevent more than one compartment being opened at a time. Optional receding-flipper

door lateral files shall be available, with fixed shelves and either 12" or 15" opening heights. Optional counterweight shall be available.

Wardrobe Towers: Shall have the general construction described above, with a 3/8" radius on the front vertical edges of all drawers. All 12" file drawers shall have full-extension ball bearing glides. Shelves shall be adjustable in 2" increments. Storage doors shall have nickel-plated, self-closing, concealed hinges which allow for 110° opening, and shall be fully and easily adjustable both vertically and horizontally.

Storage Cabinets: Shall have the general construction described above, with a 3/8" radius on the front vertical edges of all enclosures. Shelves shall be adjustable in 2" increments. Storage doors shall have nickel-plated, self-closing, concealed hinges which allow for 110° opening, and shall be fully and easily adjustable both vertically and horizontally.

Baked Enamel Finishes: Available in a variety of colors of your choice. Metal surfaces shall be cleaned, phosphatized and double sprayed. High solids baked enamel shall be used. Finish shall be electrostatically applied and shall undergo deep-bake cycle at a temperature of 350°F.

Packing: All storage and filing units shall be fully assembled and individually packaged for shipment in properly designed shipping containers and palletized whenever possible.

Workmanship: All storage and filing units shall be constructed using only the best quality materials and workmanship. There shall be no rough edges or defects.

Performance Tests: All storage and filing units shall meet or exceed all applicable ANSI/BIFMA standards. Tests available upon written request.

Dimensions: All listed dimensions are nominal. Consult ordering notes or factory for precise dimensions.
